

ServeNoMaster 079: How to Quit Your Job in 3 Steps

Subtitle: Simple Advice For Achieving Lasting Success

Key Takeaways:

- Two Elements of Success: a good plan and good execution
- A bad plan is something that is too good to be true. Anything that is high money and low work.
- Real businesses take time and effort to grow and become successful.
- Step 1: Find a process to follow.
 - Finding the right path is about finding a course and system that you can work on.
- Step 2: Put in the time and effort needed.
 - Put in the time to finish the courses you purchase; to make your business grow.
- Step 3: Grow your business organically.
 - Don't put too much money too quickly. Start your business carefully.
 - Don't spend too much until you get better profit.
 - Wait until the cost of an improvement is lower than the profit you'll make.
 - When you hit that first success, resist the urge to throw too much money into growth.
 - When growing your business, find a system that you'll stick with, stick with it until you make money and don't jump the gun by over investing in your company.
- The course you're following is the engine, the time you put in is the gasoline. Combined, they will result into success.
- Any get rich scheme is not a real business.
- Look for something you're passionate and interested enough that you can put in the effort it takes and you can stay the course.
- When you have access to something, don't blow your chance! Grab it.
- Do not be trapped by rules that hold you back. Make your own.
